CLAIMS

[Claim(s)]

[Claim 1]

In personal digital assistant equipment equipped with the camera function and the e-mail creation transceiver function,

A face element specification means to specify as a field where the eyebrows of a photographed person's face, an eye, and lips are contained, and to extract from the image data of the predetermined part in photography data, The eyebrows of a face, an eye, and a storage means to associate and memorize the image data extracted as each element of lips, and the image data of a photographed person's face, A control-parameter creation means to create the eyebrows of a transmitting person's face, an eye, and the control parameter made to deform each element of lips at an e-mail transmission place, If the control parameter is contained in the mail which is equipped with a control electrical-parameter-extraction means to extract the control parameter contained in the received mail, receives, and is reproduced, while displaying a transmitting person's image on a subwindow with the e-mail text The eyebrows of a transmitting person's face displayed on the subwindow according to the control parameter contained in e-mail, an eye, personal digital assistant equipment characterized by deforming each element of lips.

[Claim 2]

In personal digital assistant equipment according to claim 1,

The above-mentioned control parameter is personal digital assistant equipment characterized by being constituted by the variable showing feeling, and the variable showing display time.

[Claim 3]

In personal digital assistant equipment according to claim 1,

Personal digital assistant equipment characterized by the ability to set up the timing of animation playback initiation with the playback initiation parameter depending on the time amount from an e-mail text display, and e-mail text scrolling while having a means to generate animation from the image made to deform each element of eyebrows, an eye, and lips.

[Claim 4]

In personal digital assistant equipment according to claim 3,

The above-mentioned control parameter is personal digital assistant equipment characterized by having data which specify animation playback initiation timing.

[Claim 5]

In personal digital assistant equipment given in any 1 term of claims 1-4,

Personal digital assistant equipment characterized by having the function which transmits and receives the above-mentioned control parameter or a playback initiation parameter.

[Claim 6]

In personal digital assistant equipment according to claim 1,

Personal digital assistant equipment characterized by having the function which transmits and receives a photographed person's photography data.
